

Optimisation in Industry Workshop

University of Auckland, 24-26 February

What is OptALI?

OptALI stands for *Optimisation and its Application in Learning and Industry*. The OptALI project encourages the exchange and strengthening of research collaboration via an exchange programme that allows European OptALI members to visit Auckland and Canterbury Universities, and similarly New Zealanders to visit the European partner universities. Details are on our website optali.com.

OptALI Industry Workshop

The Department of Engineering Science at the University of Auckland is proud to announce the OptALI Industry Workshop held at the University of Auckland.

The workshop will bring together industry representatives and researchers. We plan to run one afternoon of the workshop in conjunction with the New Zealand Analytics Forum. Among other topics, sessions will be themed around public and private transport, health and asset management. Everyone is invited to present their research or practical industry experience, and we are especially looking forward to topics with industry relevance. There will be sessions of most interest to researchers, and industry focused sessions to which we will invite industry representatives.

Attendance

We are looking forward to your participation in the workshop in Auckland. If you would like to attend the workshop please let Olga know by email. If you are willing to talk at the workshop please also send the title and abstract of your talk to Olga by Monday 3rd Feb.

Details

Where: Department of Engineering Science, University of Auckland
